EDUCATION

PhD Biomedical Sciences, Specialization in Bioinformatics | University of California San Diego | November 2023

Dissertation title: “Leveraging human genetics and functional genomics to investigate insulin resistance disorders”

BS Pharmaceutical Chemistry, Minor in Bioinformatics | University of California Davis | June 2018

summa cum laude Major/Minor GPA: 3.9

RELEVANT EXPERIENCE

Senior Scientist- Computational Genomics, Fauna Bio, Emeryville, CA

Feb 2025 – Present

Identify and prioritize translatable genetic targets responsible for protection in animal models of disease resistance using a variety of omics data (i.e. bulk/single-cell RNA-seq, large-scale human genomics datasets including UK Biobank)

Majithia Laboratory, School of Medicine, University of California San Diego, La Jolla, CA

Postdoctoral Scholar

Nov 2023 – January 2024

Graduate Student Researcher

June 2019 – Nov 2023

Integrate high-throughput genomic screens, diverse omics datasets, and large-scale human genetic databases to prioritize novel therapeutic targets for prevalent metabolic disorders such as diabetes and cardiovascular disease.

Research Intern, Gilead Sciences, Foster City, CA

June 2018 – Sept 2018

Research Intern, Cytokinetics, South San Francisco, CA

June 2017 – Sept 2017

Clinical Data Intern, Pharmacyclics, an AbbVie Company, Sunnyvale, CA

June 2016 – Aug 2016

SKILLS

Technical:

- **Statistical/population genetics** (GWAS, e/pQTL, fine-mapping, burden testing, Mendelian Randomization)
- **Next generation sequencing & bioinformatics workflows** (bulk/single-cell RNA-seq, nextflow)
- **Scripting languages** (R, Python), Linux-based environments (bash), **parallel/high performance and cloud computing** (AWS, GCP), and **git version control**
- Mining and analyzing relevant **biological databases** (GTEx, ENCODE, Ensembl, GEO, SRA)
- Familiar with **machine learning models** and applications, adept in **prompt engineering** for utilizing large language model tools

General:

- Industry experience with **drug discovery and development**
- Experienced in **leading and collaborating** with **multi-disciplinary teams** comprised of computational data scientists, experimentalists, and clinicians
- Adept in **perusing scientific literature** and understanding emerging studies
- Strong **track record of scientific publications, conference presentations**, and mentoring
- **Driven, creative problem solver**
